SKILLS

- React
- Node.js
- JavaScript
- MongoDB
- Express.js
- Java
- SQL

Project

- **My Portfolio**:- Showcase web development skills, project experience, and professional background.
<https://sanamchudhary.github.io/>
- **Tic-Tac-Toe**:- Create a Tic-Tac-Toe game where two players (X and O) take turns to mark spaces in a 3x3 grid. The player who aligns three of their marks vertically, horizontally, or diagonally wins.
<https://sanamchytictactoe.netlify.app/>
- **Simple Portfolio**:- Simon Says is a fun and interactive memory game where the player must repeat a sequence of colors (or other elements) shown on the screen. This project is a great way to showcase my ability to integrate all three technologies effectively in a real-world application. It highlights your skills in interactivity, design, and logic implementation. The technologies used to build JavaScript, HTML, CSS
